THE UNIVERSAL CAR

The Ford One Ton Truck may well be classed as an agricultural necessity, it fits into and fills so many wants on the farm. It is a reliable bearer of farm burdens, not only doing the work of several horses quicker and better than the horse, and does not "eat its head off" when not working. The aggressive farmer has only to consider the possibilities of the Ford Truck and he is ready to buy one. We judge this to be so from the way farmers are buying them. Truck Chassis \$350 f. o. b. Pickens County Department

Farm work has been retarded in this county the past week due to rains which have fallen in several sections of the county. From reports it seems that the Aliceville section has received more than any other community, heavy rains having fallen there on Thursday and Friday. While most of the crops have been cleaned they are small for the time of year and indications point to a small yield. The boll weevil is here in large numbers and are on duty continually for fear the cotton will produce a square that will escape them. For the past two years very little attention has been given to cotton, each farmer planting only a small acreage, but the prevailing high price of last season run them wild and this year they are back in old time form with nothing in view but a complete failure. During these two years they devoted their attention to diversification and as a result raised enormous crops of corn, which naturally raised many hogs and during the past six or eight months fifty-one cars of hogs have been shipped from this county. Twenty-one of these cars were shipped on the co-operative plan and the farmers were all well pleased with the returns from the sales. Just why they dropped the money-making plan of diversification and went back to cotton cannot be understood by those who are in close touch with the condition of the farmers and watch their daily progress. In these two years they have made money, but present indications are they will drop it all this year in a cotton crop and will be forced back to the mortgage plan another year.

Mrs. L. B. Duncan returned Friday to her home in Reform after spending several days in Birmingham. A revival meeting has been in progress at the Baptist church in Reform the past week and will continue until next Wednesday night. Rev. Poole, an evangelist of Mississippi, is in charge of the services which are attended by large congregations each day, and by his simple way of explaining the gospel of Jesus Christ has resulted in much good.

Mr. Howard Noland and Mr. Bob O'Brien, representing the wholesale grocery firms of J. L. Walker & Son and T. J. Locke, of Columbus, Miss., were in Carrollton last week in the interest of their respective firms. These two gentlemen are well-known and popular with a large circle of friends down this way and their

weekly coming is always looked forward to much pleasure as they enjoy a few games of dominoes and invariably stage themselves in a game as Mississippi against Alabama. They are good players and some time have the good luck of winning, which brings a happy smile to Bob O'Brien, but kill double six in his hand and order the hearse to haul it away, a frown will appear like unto that which he gives a customer when he is refused an order.

Miss Mabel Sanders, an attractive young lady of Aliceville, left last Tuesday for North Carolina, where she is spending a while in the mountains of that state.

Mr. F. S. Baker, of Memphis, Tenn., spent a few days of the past week in this his old home, greeting old friends and making new acquaintances. He is now spending a time with his brother, Mr. T. A. Baker, at Dancy, in the southern portion of the county.

Death claimed a good woman when Mrs. E. M. Dillard passed away at her home in Reform on Monday, June 23rd, after an illness extending through the past several weeks, her dying couch being surrounded by loved ones and friends, who watched for days in the hope that her life would be prolonged. Mrs. Dillard was seized with a severe attack of pneumonia about six weeks previous to her death and this coupled with a complication of diseases hurried the peaceful ending of a life well worthy of emulation. Deceased was a devout member of the Presbyterian church and her long life was filled with good deeds. She was born October 16th, 1857, and was at the time of her death sixty-one years of age. Besides the husband she is survived by four daughters, Mrs. Hayes Wilkinson, Mrs. Ed. Hannah, Mrs. W. J. Graham and Mrs. Sam Simms, and one son, Mr. Willie Dillard, together with numerous relatives, who are stricken with grief on account of the passing of their loved one. Funeral services were held from the Presbyterian church in Reform Tuesday morning at ten o'clock conducted by the pastor, Rev. Charles H. Nabers, after which interment occurred in the cemetery at that place and was attended by a large concourse of sympathizing friends to pay their last respects to the memory of this good woman.

The Graham family held their annual reunion at the late residence of Mr. George M. Graham, deceased, and the gathering was attended by a large number of the family. During the life of Mr. Graham these annual affairs were in force and since his death they are held each year, more to commemorate the life of their departed one than the coming together of the family for a reunion.

Weekly Health Talks

Where Most Sickness Begins and Ends

BY FRANKLIN DUANE, M. D.

It can be said broadly that most human ills begin in the stomach and end in the stomach. Good digestion means good health, and poor digestion means bad health. The minute your stomach fails to properly dispose of the food you eat, troubles begin to crop out in various forms. Indigestion and dyspepsia are the commonest forms, but thin, impure blood, rashes, blemishes, pimples, blotches, redness, belching, coated tongue, weakness, poor appetite, sleeplessness, coughs, colds and bronchitis are almost as common. There is but one way to have good health, and that is to put and keep your stomach in a good order. This is easy to do if you take Dr. Pierce's Golden Medical Discovery. It is a wonderful tonic and blood purifier, and is so safe to take, for it is made of roots and herbs. Dr. Pierce, of Buffalo, N. Y., stands behind this standard medicine, and it is good to know that so distinguished a physician is proud to have his name identified with it. When you take Golden Medical Discovery, you are getting the benefit of the experience of a doctor whose reputation goes all around the earth. Still more, you get a temperance medicine that contains not a drop of alcohol or narcotic of any kind. Long ago Dr. Pierce combined certain valuable vegetable ingredients—without the use of alcohol—so that these remedies always have been strictly temperance medicines. If piles are torturing you, get and use Pierce's Anodyne Pile Ointment. The quick relief it gives is hard to believe until you try it. If constipated, Dr. Pierce's Pleasant Pellets should be taken while using Anodyne Pile Ointment. Few indeed are the cases which these splendid remedies will not relieve and usually overcome. They are so good that nearly every drug store has them for sale.

Next Friday promises to be a red letter day in the history of this county when the people will gather at Carrollton to honor the returned soldiers with a big barbecue and basket dinner, in which the old boys of the 60's will participate, holding their annual reunion on this day. We are informed that all picnics and other gatherings that had been planned for the day by people over the county have been canceled and it is expected that one of the largest crowds ever seen in Carrollton will be here to join in the celebration. Works Like a Hoe

Covers 8 Acres a Day

It does as good work as you can do with a hoe—it cuts every weed—None can dodge it—Keeps the surface in condition to readily absorb rain and produces a mulch or dirt blanket of the soil which prevents the escape of soil moisture. One trip to the row—narrow or wide.

The Light Draft Fowler Cultivator

With one horse The Fowler does as much work as you can do with a two-horse cultivator—and better work—because it cultivates uniform—has no prongs or teeth to disturb the crop roots. By removing plow soil you can cultivate outside the row. It can also be adjusted to cultivate crops planted either above or below the level without disturbing the sloping sides of the ridges.

It's the cultivator for corn, potatoes, beets, arnips, cucumbers and other crops planted in rows. It is unexcelled also as a Bean harrower.
